**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels in the sunshine. Extra care to be taken in the event of heavy showers and thunderstorms, with pathways becoming slippery and muddy underfoot. Additional hazards will be lightning, hail and gusty winds in association with any thunderstorms during the day.

Forecast for Friday 02 Aug 2024

Weather: Low cloud shrouding the summits. The cloud will be thick enough to give some outbreaks of patchy light rain and drizzle at times, especially in the south and west. Drier and brighter to the north and east, with some sunny spells. However, a band of cloud and outbreaks of rain, locally heavy, will spread eastwards across all parts in the late afternoon.

Maximum wind: South to southwesterly 20-25mph, gusting to 25-30mph at first, increasing 35-40mph, possibly gusting 45-55mph by the evening

Chance of cloud-free hill tops above 800m: 30% throughout the day.

Low Cloud and visibility: Low cloud, with bases down to 200-300m during the morning. Briefly lifting above the summits for a time in the morning, before lowering to 300-400m in rain by the late afternoon.

Temperature: **Valleys:** Plus 12 Celsius, becoming Plus 20 Celsius.
At 800m: Plus 9 Celsius, becoming Plus 11 Celsius.
Freezing level: Above the summits.
